SUMMARY

Systems Engineer with over 4 years of hands-on experience in Linux system administration and troubleshooting. Responsible for maintaining infrastructure stability and supporting daily operations across virtualization and cloud environments. Recognized for a practical approach in resolving issues and effective collaboration with cross-functional teams.

WORK EXPERIENCE

Senior IT Infrastructure Engineer, Abyres Sdn Bhd

Dec 2024 - Present

- Deployed and configured a self-hosted GitLab Enterprise instance for a client, chosen specifically to leverage GitLab's built-in SAST/DAST scanning. Designed two reusable pipeline templates: one adapted to the client's legacy environment for automated .NET deployment, and one a modern, containerized CI/CD pipeline with GitLab SAST/DAST integrated, built as a template the client to enabling roll out across future projects. Standardized release management with flow templates and ticketing structures.
- Designed and implemented a GitOps workflow for a custom CMS portal on a K3s cluster, using ArgoCD for application delivery and Gitea as a private container registry and code repository. Refined the pipeline to a point where production deployments now take under 10 minutes, enabling a more agile release approach.
- Contributing to an in-house AI-driven security assessment product that accelerates vulnerability, post-quantum cryptography (PQC), and broader security assessments, with application and database performance analysis as an added capability; built a custom harness integrating multiple open-source security tools on top of a self-developed AI agent framework.
- Designed and implemented a consolidated monitoring and observability solution (Prometheus, Grafana, Loki) for a telco client, covering VMware vSphere, NetApp AIQUM, NetBackup, and NetScaler infrastructure.
- Support and maintain a banking platform on a legacy OpenShift environment, validating and adapting operational procedures to preserve platform stability, uptime, and compliance.
- Customized Red Hat SSO integration with OpenLDAP by developing a custom Service Provider Interface (SPI) in Java/Maven, eliminating manual directory synchronization and reducing identity management overhead.
- Resolved infrastructure support tickets spanning storage, virtualization, and security configuration, maintaining system reliability and audit compliance.
- Coordinated standby support schedules across the team, ensuring continuous coverage and timely incident response.
- Mentored new team members in Linux system administration fundamentals.

Cloud System Engineer, Soprano Design Pty Ltd**Dec 2023 - Nov 2024**

- Maintained organizational cloud infrastructure (AWS and Azure) across hosting, networking, and monitoring.
- Developed a Red Hat Linux patching procedure to meet security audit requirements, and produced supporting automation scripts in Ansible and Python to improve patching compliance and reducing manual effort.
- Resolved complex technical issues through root-cause analysis and documented best practices.
- Collaborated cross-functionally from planning through implementation of product change requests.
- Remediated incomplete resource controls and completed documentation for security audits.
- Managed security incidents via Extended Detection and Response (XDR) ticketing.

Executive DevOps, Aerodyne Geospatial Sdn. Bhd.**June 2022 - Dec 2023**

- Provisioned and managed cloud hosting infrastructure, primarily on AWS.
- Delivered cost-optimization analysis for object storage tiering and VM purchasing, reducing infrastructure spend from object storage service with reduction of 25% from the total monthly bill.
- Built CI/CD pipelines in collaboration with the software department to streamline product delivery.
- Automated repetitive operational tasks (SSH credential management, SSL renewal, firewall policy) using Terraform and Ansible.
- Managed SSL certificates, domains, and DNS across multiple providers.
- Provided second and third level technical support for internal and external operations, troubleshooting system, network, and application performance issues.

Graduate Software Developer (Cloud), Synapse Innovation**Dec 2021 - May 2022**

- Responsible to manage company's product hosted through public cloud service such as Digital Ocean and AWS.
- Involved into deployment process using containerization tools such as Docker
- Manage the organization SSL certificate and domains of the company's product through DNS management console.
- Collaborate with a solution architect to bring out an efficient cloud solution for the BAU project.
- Troubleshoot any issues raised by the clients regarding system's product, site availability and application performance
- Provide 2nd and 3rd-level technical support in a day to day task for company's product

Internship Data Engineer, Axrail Pte Ltd**Sep 2020 - Feb 2021**

- Produced a data pipeline to manage clients' data lake using AWS services starting from crawling the raw data until visualize the business data through AWS Glue, Redshift, Athena and Quicksight.
- Collaborate with the business team in terms of develop the source code by integrate with multiple AWS services as a proof of concept for the client
- Support the development team with reproduce and verified the issue reported by customer through the ticket

EDUCATION

Bachelor of Computer Science (Graphics & Multimedia Software Engineer)

Sep 2017 - Oct 2021

University of Technology Malaysia (UTM)

- Specialization in graphics and multimedia software engineering.
- Thesis on "Web-based Indoor Navigation Application, Navi"UTM".

Malaysian Matriculation Programme

June 2016 - May 2017

Malacca Matriculation College

- Undertake a course with specialisation of engineering that consists Physics, Chemistry, Mathematics and Computer Science.

ADDITIONAL INFORMATION

- **Technical Skills:** Linux System Administration, AWS, Kubernetes, Docker, Ansible, Terraform, AWS Cloudformation, Git, Jenkins, Nginx, Cloudflare, Prometheus, Grafana, Loki, Bash Scripting and Python
- **Languages:** English and Malay
- **Certifications:** Certified Kubernetes Administrator (CKA) | [Link certification here](#)
- **Awards/Activities:**
 - Member, Computer Graphics & Multimedia Association (CGMA), UTM
 - Unit Multimedia, 63rd Convocation Festival, UTM
 - Unit Multimedia, Students College Committee KTDI, UTM
